

*National Concrete &
Corrosion Symposium*

Sponsorship

Sponsoring the 2020 **National Concrete & Corrosion Symposium** at the National Center for Education and Research on Corrosion and Materials Performance (**NCERCAMP**) is a way to grow visibility for your brand, and connect with new customers while sharing how your products and services make a difference. Whether you are trying to reach students or product decision makers, sponsoring this unique symposium will provide your brand valuable exposure to those who design, specify, and build in the concrete and corrosion markets.

This year we are pleased to offer a variety of sponsorship opportunities for all budgets. Funds collected through sponsorship directly help important research at NCERCAMP so you know you are making a direct impact on students and new technology development. The 2020 event is extra special as we have partnered with **CSI Next**, a virtual chapter of the Construction Specifications Institute (CSI) and funds collected will also be utilized to provide free CSI annual memberships for student attendees, increasing their understanding of construction documentation and placing them in a professional network that can jumpstart their careers.

We look forward to seeing you at the symposium and thank you for your support!
